Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 30 and 31 are rejected under 35 U.S.C. 103(a) as being unpatentable over the prior art described at page 1, lines 8-17 in view of the Patent to Godat. The prior art description includes a watch movement with a generator the rotor of which is driven by a spring over a gear train, and an electronic regulating circuit. The Godat reference teaches lubrication with oil of the bearings of the gears of a watch movement (col. 2, lines 28ff). Thus, one of ordinary skill in the art having both references would have a suggestion of providing oiled bearings in the prior art watch/generator described in applicant's specification as a conventional means for lubricating the watch movement gear train.
2. The specific type of oil used as lubricant claimed by applicant, being an ozone-resistant type oil would be an obvious choice for one skilled in the art in view of the use of such oils for lubrication. The example given in applicant's specification of Fomblin is a well known lubricant and one skilled in the art would be familiar with uses thereof for

Art Unit: 2841

lubricating gear bearings. The prior art problems of spark discharge/ozone depletion in a timepiece generator geartrain described at page 3 of applicant's specification would lead one skilled in the art to provide a lubricant which would be most effective in such an environment. Applicant's arguments, therefore, are not convincing.

3. With respect to claim 31, a non magnetizable material for the gears and non epilamized surfaces thereof would be obvious in view of the suggestion of non magnetizable materials for the geartrain components at page 3 of the specification and the need for conductive surfaces for proper grounding also noted in the description of the prior art.

4. The Frei & Borel reference cited discloses a "Fomblin Grease" for timepieces.

5. Claims 1-29 are allowed.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within

Art Unit: 2841

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
